Company Name: ValuEnable Pvt Ltd (A Zerodha backed Insurtech)

Position: Senior Full Stack Developer

We are looking for a Senior Full Stack Developer to develop and maintain our digital solutions. You'll be part of a cross-functional team that's responsible for the full software development life cycle, from conception to deployment.

As a Full Stack Developer, you should be comfortable around both front-end and back-end JavaScript coding languages, development frameworks and third-party libraries. You should also be a team player with a knack for visual design and utility.

If you're also familiar with Agile methodologies, we'd like to meet you.

Major Responsibilities

- Strong experience with **Express.js, React, Node.js, MySQL** with ability to plan, build, and deliver end-to-end product features.
- Create highly usable and scalable database designs and APIs. Build interactive, responsive & performant front-end interfaces.
- Actively participate in design and code reviews.
- Work with development teams and product managers to ideate business friendly software solutions. Taking part in Demos, Sprint Planning, Retrospectives etc. with the rest of the team
- API development, testing and deployment
- Build features and applications with a mobile responsive design
- Write technical documentation. Ensure product passes all stages before deployment to production
- Manage and regulate security compliances as per industry standards

Why Should You Consider Working (In this Role!) With ValuEnable?

- We are a 2-year old well-funded and profitable, service focused insurtech venture, solving a USD 31 Bn per year customer retention problem for insurers. We work with 8 of the top 10 private Life insurers in the country helping them solve this problem.
- One of India's most well respected financial institute, **Zerodha,** is our lead institutional investor through it's fintech investment arm, Rainmatter Fintech Investment
- You will work with significantly senior levels at our partners' end, helping address their specific requirements.
- You will be handling interactions with multiple stakeholders such as business, technology and product teams. You can leverage the experience you already have, we promise your experience will only be enriched!
- Opportunity to participate in ESOP Pool of an early-stage venture

Requirements

- 5+ years of work experience as a Full Stack Developer or similar role
- Experience developing web and mobile applications and working with containers
- Previous experience in insurance domain would be an added advantage
- Full stack development experience in Node.js and React

- Familiarity with databases (e.g. MySQL, SQL server), web servers (e.g. Apache) and UI/UX design
- Excellent communication and teamwork skills. Degree in Computer Science or relevant field
- Experience with CI/CD and knowledge of AWS Cloud or Microsoft Azure
